

Imports for the year 2015

Department of Trade Statistics

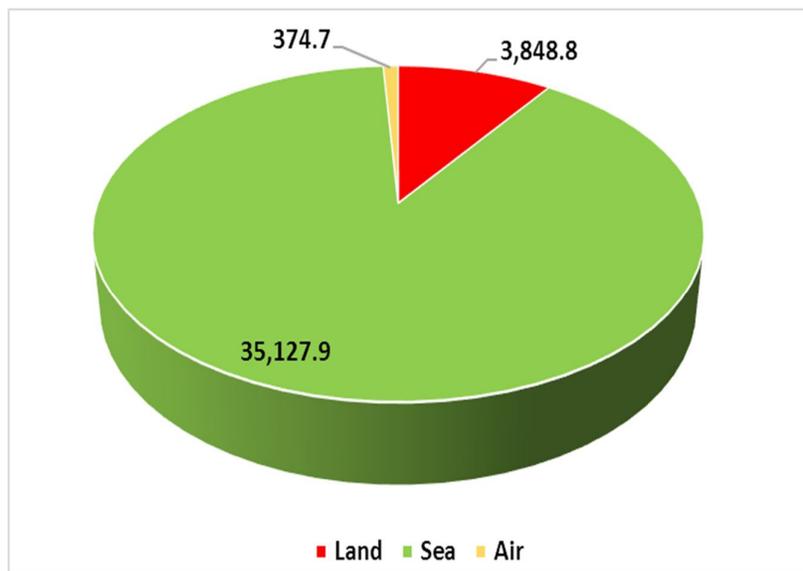

Imports for the year 2015

8- Imports by road and border crossings: -

- The total imports of goods (non-oil) by land ports border (3.8) billion dollars is equivalent to (4.5) trillion Iraqi dinars registered a decrease of (64%) for the year 2014 where it reached (10.7) billion dollars is equivalent to (12.5) trillion Iraqi dinars, the proportion of the form (9.8%) of the total imports of goods (non-oil) for the year 2015 as shown in Table (7).
- The total imports of goods (non-oil) by the sea ports border (35.1) billion dollars is equivalent to (41) trillion Iraqi dinars registered the highest increase in the amount of (185%) for 2014, reaching (12.3) billion dollars, the equivalent of (24.8) trillion Iraqi dinars, the proportion of the form (89.3%) of the total imports of goods (non-oil) for the year 2015 as shown in Table (7).
- The total imports of goods (non-oil) by air ports border (0.4) billion dollars is equivalent to (0.4) trillion Iraqi dinars registered the decrease of (33%) for the year 2014 where it reached (0.6) billion dollars is equivalent to (0.7) trillion Iraqi dinars, the proportion of the form (0.9%) of the total imports of goods (non-oil) for the year 2015 as shown in Table (7)..

Figure (5) the value of imports by way and border crossings for the year 2015

Imports for the year 2015

4- June was the highest percentage of the total imports for the year 2015 increased by (29%), reaching (12,060.8) million dollars, equivalent to (14,063.4) billion dinars, while the month of February the form of a higher proportion of the import of oil products increased by (10.1%), reaching value (231.3) million dollars equivalent (269.7) billion dinars and the month of June, the highest percentage of imports of goods (non-oil) by (30.2%), where the total value (11,876.4) million dollars, equivalent to (13,848.7) billion dinars, as shown in Table (3).

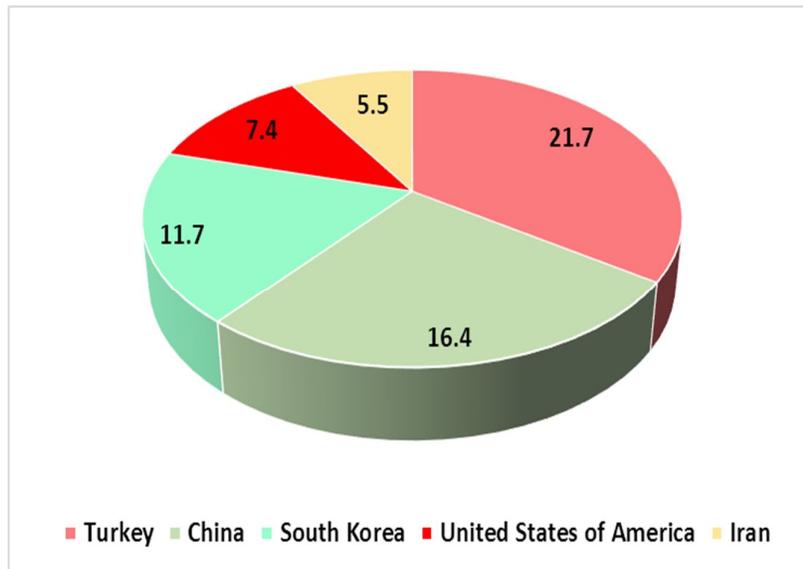

5- The value of total net trade balance for the year 2015 amounted to (7.8) billion dollars, which is equivalent to (9.0) trillion Iraqi dinars, as shown in Table (1).

6-The amount of trade deficit of imports of goods (non-oil) for the year 2015 amounted to (39.2) billion dollars is equivalent to (45.7) trillion Iraqi dinars, while the net trade balance of imports of oil products (46.9) billion dollars, equivalent to (54.7) trillion dinars As shown in Table (1).

7- Major Trade Iraqi Partners :-

The highest value of imports for the year 2015 from Turkey (8.5) billion dollars equivalent to (9.9) trillion Iraqi dinars, and by (21.7%) of the total imports non-oil merchandise followed by the China worth (6.5) billion dollars is equivalent (7.6) trillion Iraqi dinars to and by (16.4 %) of the total imports of goods of non-oil and then followed by South Korea (4.6) billion dollars, equivalent to (5.4) trillion Iraqi dinars and by (11.7%) of the total imports of goods (non-oil) as shown in Table (5).

Figure (4) The proportion of Imports (non oil) for Five major trade iraqi partners for the year 2015

Imports for the year 2015

Analysis of the results

1-Total imports:-

Total imports for the year 2015 for commodity (non-oil) and products oil (41.6) billion dollars, equivalent to (48.6) trillion Iraqi dinars, recording the highest increase in the amount of (12.4%) from the year 2014 where it reached (37.1) billion dollars, equivalent to (43.3) trillion Iraqi dinars, with a Compound growth rate of (11.7%) for the year 2013 as shown in Table (2).

2 - Imports of commodity (non-oil):-

Total imports for the year 2015 for material non-oil merchandise (39.4) billion dollars, which is equivalent to (45.9) trillion Iraqi dinars, recording increase in the amount of (21.1%) from 2014, reaching (32.5) billion dollars, which is equivalent to (37.9) trillion Iraqi dinars at the current rate of customs statement and at a decrease compound growth rate of (17.6%) for 2013 as shown in Table (2).

3- Imports of oil products: -

Total imports for the year 2015 for oil products (2.3) billion dollars, which is equivalent to (2.7) trillion Iraqi dinars a decrease of (49.9%) for the year 2014, reaching (4.6) billion dollars, equivalent to (5.3) trillion Iraqi dinars in terms of growth rate Composite decreased by (31.8%) for 2013 as shown in Table (2).

for the period 2013 - 2015

Imports for the year 2015

Methods of calculation:-

Ratio was calculated as the annual change in the following equation :-

$$R = [(X_1 / X_0) (1 / t_1 - t_0) - 1] * 100$$

t_0 , the base year t_1 , the comparison year X_0 , base-year data X_1 , R-year data comparing the rate of change

Was calculated compound growth rate of the value of exports, as in the following equation

$$R = (((X_1 / X_0) ^ (1 / (t_1 - t_0))) - 1) * 100$$

t_0 , the base year t_1 , the comparison year X_0 , base-year data X_1 , data comparison year compound growth rate of R

Classifications used:-

1- (02 -HS) - System Harmonized Commodity Description and Coding System (Second Revision) HARMONIZED COMMODITY DESCRIPTION AND CODING SYSTEM.

2- (BEC-04) - extended economic classification categories (Fourth Revision) CLASSIFICATION OF BROAD ECONOMIC CATEGORIES.

Concepts and Definitions:-

- ❖ Country of origin - the country that manufactured, extracted, or cultivated a commodity. Regardless of the region, which was shipped from them.
- ❖ Entry points - is the border areas of customs accepted for entry or exit of goods across international borders into Iraq.
- ❖ Weight - means the net weight of the commodity-based weight a less "than the weight of packaging materials and is expressed in kilograms.
- ❖ Amount - the amount of goods imported or exported countable as the number of televisions or cars or square meters of fabrics, and the size of the cube timber...etc.
- ❖ Commodity classification - goods classified according to the Harmonized Commodity Description business for the year 2002 (HS-02) HARMONIZED COMMODITY DESCRIPTION AND CODING SYSTEM.
- ❖ Imports (CIF) - (COST INSURANCE AND FREIGHT) value of the goods and the services provided for the delivery of goods to the borders of the country of export and the value of services provided for the delivery of goods from the limits of the country of export to the borders of a country imports.
- ❖ Exports (FOB) - (FREE ON BOARD) is the value of goods and the services provided for the delivery of goods to the borders of the country of export.

Imports for the year 2015

Introduction:-

The economic planning become a comprehensive is "necessary" for all developing countries seeking to exploit the economic resources and human resources to achieve high rates of economic development, this sector led the foreign trade position "whatever in determining the dimensions and the path of economic development plan overall, where exports contribute directly to increase the national income, The imports are contributing indirectly to raise the rates of growth of national income, through the empowerment of the national economy to get the investment goods and production inputs needed for the development process. The Central Statistical Organization Pleased to submit the annual report of imports of government and private sector for 2015 we hope to have provided Information.

Data Sources:-

1. Commodity imports -have been relying on electronic data sent from the Ministry of Finance / General Authority for Customs.
2. Imports of petroleum products - has been relying on data Iraqi Central Bank/ Directorate General for Statistics and Research / Department of balance of payments statistics based on data from the Ministry of Oil / Oil Marketing Company.

Methodology of work:-

1. We received electronic data from the General Authority for Customs / Department calculator to all ports except the border province of Kurdistan.
2. data is sorted and grouped by the type of material and the country of origin, and the development of the classification code in the Department of Trade Statistics, where the total number of records (623891) during the year 2015.
3. The monthly and quarterly data collected for preparation of the annual report as the system (Access).
4. value of imported goods (excluding oil and petroleum products) include the private sector and the government sector, customs duties and exempted.
5. Value is calculated at the exchange rate of the Iraqi dinar in the current General Authority for Customs and the equivalent of the dollar.
6. Followed by Iraq (your system) when the collection and compilation of foreign trade data, which means registration Item (statistically) through the entry or exit of the border (points) customs and not territorial boundaries.
7. Is evaluated exports - on the basis of (FOB) and imports are evaluated basis (CIF).
8. Rounding: Figures rounded to the nearest decimal and this may lead to a mismatch with the total sum of detail in some of the tables.

Balance of trade for the year 2015

Type	(CIF)Imports value		Type	(Exports value (FOB		Balance of trade	
	Value mill (\$)	Value mill (I.D)		Value mill (\$)	Value mill (I.D)	Value mill (\$)	Value mill (I.D)
